

Protect. Prevent. Improve.

Solutions from GenEon Technologies' innovative line of products allow Universities, Colleges, K-12 and other education facilities to reduce their cost for cleaning and sanitizing/disinfecting, while helping them to: achieve sustainability objectives; reduce absenteeism; improve safety metrics; and creates a cleaner, safer and healthier environment. GenEon's line of Electrochemical Activation (ECA) products generates cleaners, degreasers, and sanitizer/disinfectant on-site.

Why GenEon Solution:

- ✓ **Protect** students and staff from the harmful effects of traditional chemical cleaners, sanitizers and disinfectants
- ✓ **Prevent** virus and bacterial outbreaks, and creates a healthier environment
- ✓ **Improve** absenteeism rates and the overall school environment

“Where to use?”

GenEon's InstaFlow supports a wide variety of areas in educational facilities including: Classroom, Whiteboards, Bathrooms, Door Knobs, Kitchen Areas, and Dining Rooms. Athletic Areas, Gyms, Bathrooms, Mirrors, Glass, Dorm Rooms, Baskets, Tables, Chairs, Floors, Sinks, Stripping Floors and much more...

“What experts are saying?”

...wanted to tell you that we here at Emory University were so appreciative of your work and efforts to put the “Immerse A Clean” clean machine in our hands in our hour of need during a recent outbreak of Norovirus on our campus. The disinfectant that this produced as well as the foggers we ordered from you helped us make sure that relatively small outbreak that we had, remained that way and was pushed back very quickly. Though we used this technology to augment our usual cleaning regiment so cannot say conclusively that its effect was what directly attributed to our quelling this outbreak as rapidly as we did; I will go back to my many years of experience in healthcare and numerous outbreaks that I was a part of taking care of to say that I have not seen an outbreak like this one reduced and eventually eliminated as quickly as this was.

GenEon's innovative and proven solutions have helped one school district reduce their absenteeism rate during the height of the flu season. Let us help you do the same!

Powerful Sanitizer/Disinfectant

Norovirus	H1N1	Pseudomonas
Listeria	Polio	Tuberculosis
Salmonella	VRE	E.coli 0157:H7
Herpes	Staph	Enterobacter D69
MRSA	HIV	Hep B & C

Kills Harmful Germs (when used as directed)

Benefits of using GenEon:

- ✓ Assists you to achieve Sustainability objectives
- ✓ Truly sustainable cleaning
- ✓ Reduces cost
- ✓ Increases safety for staff and guests
- ✓ Quickly and effectively destroys harmful germs
- ✓ Low to NO VOC
- ✓ Intuitive controls
- ✓ Eliminates errors from having to mix chemicals
- ✓ Eliminates need for storing large amounts of chemicals
- ✓ Configurable for large volume users

GenEon solutions are a safer and sustainable alternative to traditional chemical products and are comprised of natural minerals, water and energy – an ideal solution for healthier environments. Call or visit our website for more details.
